Description

The building has recently been totally refurbished to a very high specification yet maintaining the building's character and providing modern office space. As part of the refurbishment a new circulation core has been constructed to the rear of this listed building and a new lightweight structure developed on the second floor. The emphasis on the refurbishment has been to incorporate energy generating methods and the use of sustainable materials. The design measures have incorporated items such as air source heat pumps, photovoltaic panel technology and solar thermal panels resulting in substantial energy saving costs.

Internally the common parts have been fitted out using very high quality materials and fixtures and fitting such as Villeroy & Boch to the WCs and shower room. Art work has been commissioned by the developer to the ground floor entrance area as well as items that reflect the building's former use such as an antique clocking in/out clock.
